

PROJECT PROFILE

Title: Mass production of Teak clones through tissue culture

Principle Investigators: Dr. Rekha R. Warriar, Scientist-F

Duration: 2018-2020

Objectives:

1. To mass produce superior performing clones of *Tectona grandis* for Forest Development Corporation of Maharashtra

Funding Agency: Forest Development Corporation of Maharashtra, FDCM

Summary

- Established 10 clones of teak in tissue culture
- 50,000 plants were sent to FDCM for planting.
- 55 trials have been laid out in different sites to evaluate the TC plants.
